

PRODUCT DESCRIPTION & TECHNICAL DATA

5 Gallon

1 Gallon

Description

SureSTICK Adhesive is a one part Poly-ether based adhesive ready to use out of the can for installing Kid Kushion, Equi-Tile, SportPlay Mat and Paver Tiles.

Uses

SureSTICK Adhesive is designed to adhere EMC Rubber Tile Products to the approved sub-surface. It is used to fully adhere the entire safety surfacing assembly.

Advantages

- **SureSTICK Adhesive** is a one part adhesive requiring no mixing prior to use.
- **SureSTICK Adhesive** is fully compatible with all EMC Rubber Tiles providing a sure stick to the approved substrate.
- **SureSTICK Adhesive** is available in 1 gallon or 5 gallon buckets providing easy to carry containers in quantities that minimize waste.
- **SureSTICK Adhesive** can be ordered and shipped with your tile order insuring it is available on the job when you need it and eliminating the hassle of dealing with multiple vendors.

Storage

- Use only with adequate ventilation.
- Keep container tightly closed. Store in a cool, dry and well-ventilated area.
- Refer to manufacturer MSDS for further information.

Product Specification

Packaging: 1gal, 5gal

Coverage Rate

SureStick Adhesive covers approximately 40 to 50 square feet per gallon.

Installation

The sub-surface should be clean and dry. Ensure that the rubber tiles to be installed are clean and dry. Moisture acts as a catalyst to the SureSTICK Adhesive so dry mats and surface are essential.

The minimum temperature for installation is 50° Fahrenheit and rising. Do not open the container until immediately prior to use. Adhesive is spread over the substrate in a thick, film coating being sure to cover all areas that will receive adhered tiles.

Final cure time is dependent on temperature and humidity. Allow a minimum of 24 hours before using adhered tiles.

Refer to the product specific installation recommendations for further installation guidelines.
